

Branch Based

How can I register a user in my branch?

1. Navigate to the “Branch Users” tab

Locate the tab in the left-hand panel of the application and click to open it.

2. Fill in the registration form

Once inside the Branch Users panel, you can register a new user by providing the following details:

- Name: Enter the full name of the user.
- Email: Provide a valid email address.
- Phone: Enter a unique 10-digit phone number.
- Branch: Select the branch where the user should be registered.
- Department: Choose the appropriate department from the dropdown menu.

3. Submit and verify

After completing the form, submit the registration. The newly added user will appear in the table at the bottom of the page.

 **Note:** Only users with Branch Admin privileges can register users within their respective branches.

What are Branch Users / What is the use of Branch Users?

Branch Users are individuals assigned to specific branches within an organization's administrative system. Each user is linked to a branch and department, and their role determines what actions they can perform within that scope.

Branch Users serve several key functions:

- Decentralized Management: They allow each branch to operate semi-independently, with admins managing users and workflows locally.
 - User Registration: Branch Admins can register new users under their branch by providing details like name, email, phone number, department, and role.
 - Access Control: Roles (e.g., BRANCH ADMIN) define what permissions a user has—such as viewing, editing, or creating records.
 - Departmental Assignment: Users are also tagged to specific departments, enabling structured reporting and task delegation.
 - Audit and Tracking: The system logs creation and update dates for each user, ensuring accountability and traceability.
-

What are pending users?

Pending Users are individuals who have been added to the system but have not yet been assigned a role. They exist in a temporary state—registered but not fully activated—until an administrator completes their setup.

Purposes of Pending users?

1. **Review unassigned users:** It lists users who are awaiting role assignment, along with their basic details like name, email, mobile number, branch, department, and who created them.
 2. **Assign roles:** The “Assign Role” column allows admins to finalize user setup by granting appropriate permissions (e.g., Branch Admin, Viewer, etc.).
 3. **Track onboarding:** Created Date and Created By fields help monitor who added the user and when, ensuring accountability in the registration process.
 4. **Filter and manage entries:** Search and pagination controls make it easy to navigate and manage large volumes of pending users.
-

How to change the role of an Employee?

1. Locate the employee in the table using filters like name, branch, or department.
 2. In the “Manage Role” column, click the pencil icon next to the employee’s entry.
 3. A role-editing modal or dropdown should appear, allowing you to:
 - Select a new role (e.g., *Branch Admin*, *Viewer*, *Accountant*, etc.)
 - Confirm the change
 4. Once updated, the “Role” column will reflect the new assignment, and the “Updated By” and “Updated Date” fields will log the change for audit purposes.
-

How to generate an ID card?

1. Search for the employee using the search bar at the top (e.g., by name or email).
2. Verify the employee’s details in the table—such as name, ID, email, creation date, and status.
3. Select the desired orientation for the ID card:
 - ☐ *Vertical*
 - ☒ *Horizontal*
4. Click on the employee row to mark them as selected. The “Selected” count will update accordingly.
5. Once selected, click “Generate ID Cards” to preview or create the card.
6. After generation, use the “Download All” button to save the ID cards locally.

 You can also update the employee's profile picture using the "Change" button under the "PROFILE PIC" column before generating the card.

What is the use of Generate ID card?

-  **Identity Verification:** Ensures employees can be easily identified within the organization or at external events.
 -  **Access Control:** Can be integrated with security systems for entry into restricted areas.
 -  **Professional Presentation:** Adds a layer of formality and branding to your organization.
 -  **Record Keeping:** Helps maintain a visual and timestamped record of active employees.
 -  **Operational Efficiency:** Speeds up onboarding, attendance tracking, and inter-departmental coordination.
-

Can I add more Departments?

1. At the top of the page, locate the "Department Name" input field.
 - Enter the name of the new department (up to 30 characters).
 2. The "Branch" field is pre-filled with Jabalpur, so the new department will be linked to that branch.
 3. Click the blue "Add Department" button to submit.
 4. The new department will appear instantly in the table below, with its creation timestamp and active status.
-

What if I want to Edit/Deactivate a department?

How to Edit a Department

1. Locate the department you want to modify in the table.
2. Click the yellow pencil icon under the Edit column.
3. A form or modal will appear allowing you to:
 - Change the department name
 - Update the branch association
 - Modify other metadata if available
4. Save your changes, and the Updated On timestamp will reflect the latest edit.

How to Deactivate a Department

Option 1: Status Toggle

- If the Status field is editable, click on it or use the edit icon to change from Active to Inactive.
- This may disable the department from being assigned to new employees or used in workflows.

Option 2: Access Control

- Click the green checkmark icon  under the Access column.
- If it's interactive, it may toggle access off, effectively deactivating the department.
