

User Based

How to upload a Document/Document Upload?

1. Navigate to the Sidebar

Locate the “Upload Document” in “Document” section of the sidebar menu and click on it.

2. Fill in the Required Fields

You’ll be presented with a structured form containing various input types—text fields, dropdowns, and checkboxes. Here’s what each field means:

- **File No.**

Enter your unique file number. This acts as the primary identifier for your document.

- **Title**

Provide a concise title for your file. This helps you locate it easily in future searches.

- **Subject**

Describe the contents of your file. This field captures what the document is about.

- **Category**

Select the appropriate category for your file. Available options include:

- Annual Report
- Policy
- Finance

- **Year**

Choose the year under which the document should be archived or published.

- **Version**

Specify the version of your file. You can update this as needed for future revisions.

- **Folder Upload**

Enable this checkbox if you wish to upload an entire folder containing multiple documents.

- **Upload Files**

Use this option to select and attach your document(s) for upload.

3. Finalize the Upload

Once all fields are completed and your files are attached, click the “Upload Document” button. Your documents will be securely uploaded and stored.

What are Approved Documents?

The Approved Documents module enables intelligent tracking and review of all files that have received approval status. Within this interface, users can access comprehensive metadata for each uploaded document, including:

- **File Number** – Unique identifier assigned to the document
- **Title** – The name or label of the file

- **Description** – A brief summary outlining the file's contents
- **Category** – Classification of the document (e.g., Policy, Finance, Annual Report)
- **Approval Status** – Indicates whether the file is Approved
- **Reviewed By** – Displays the name of the approver
- **Date of Approval** – Timestamp marking when the decision was made
- **Contents Preview** – Accessible via the View button for quick inspection of the document's contents
- The Search Bar allows you to quickly locate documents by entering a File Number, Title, or Category. This smart search functionality ensures efficient retrieval of records based on key identifiers.

This module ensures transparency, accountability, and ease of access for all approved records within the system.

What are Rejected Documents?

The Rejected Documents module provides a detailed view of all files that have been declined during the review process. This interface enables users to audit and understand the reasons behind rejection, with full visibility into each document's metadata:

- **File Number** – Unique identifier assigned to the document
- **Title** – The name or label of the file
- **Description** – A brief summary outlining the file's contents
- **Category** – Classification of the document (e.g., Policy, Finance, Annual Report)
- **Approval Status** – Displays the current status as Rejected
- **Reviewed By** – Indicates the individual who rejected the file
- **Date of Rejection** – Timestamp marking when the rejection occurred
- **Contents Preview** – Accessible via the View button for inspection of the document's contents

The Search Bar allows you to quickly locate documents by entering a File Number, Title, or Category. This smart search functionality ensures efficient retrieval of records based on key identifiers.

This module ensures transparency and traceability for all rejected records, helping teams identify issues, take corrective action, and maintain a clean audit trail.

What are Search Documents?

To perform a detailed search on your approved documents, navigate to the Search Documents section within the application. This module offers a range of intelligent filters—via dropdowns and text fields—that help you pinpoint exactly what you're looking for. Here's how each filter works:

- **Branch** - Select the branch where your document is stored or associated.
- **Department** - Filter documents based on the relevant department.

- **Category** - Choose the category your file belongs to. Available options include:
 - Policy
 - Finance
 - Annual Report
 - Resume
- **Year** - Specify the year in which the document was uploaded or is expected to appear.
- **File Number** - Enter the unique identifier assigned to your file.
- **Title** - Search by the title you previously provided for the document.
- **Subject** - Use keywords from the file's description to narrow down results.
- **Version** - Filter documents based on their version number.

Once you've applied the desired filters, click the Search button—and voilà—your matching documents will be displayed instantly.

Search Documents By QR Codes?

This intelligent feature allows you to locate documents using their associated QR codes, which are automatically generated at the time of upload. You can retrieve your files in two seamless ways:

- **Upload the QR Code Image**
Simply upload the saved QR code to initiate a search for the corresponding document.
- **Scan via Integrated Camera**
Use your device's built-in camera to scan the QR code directly. The system will instantly identify and display the linked document.

This functionality ensures fast, secure, and error-free document retrieval—perfect for environments where precision and speed matter.
